

ActualtestsQuiz

- ✓ Online Tool, Convenient, easy to study.
- ✓ Instant Online Access
- ✓ Supports All Web Browsers
- ✓ Practice Online Anytime
- ✓ Test History and Performance Review
- ✓ Supports Windows / Mac / Android / iOS, etc.

- ✓ Installable Software Application
- ✓ Simulates Real Exam Environment
- ✓ Builds Exam Confidence
- ✓ Supports MS Operating System
- ✓ Two Modes For Practice
- ✓ Practice Offline Anytime

- ✓ Printable PDF Format
- ✓ Prepared by IT Experts
- ✓ Instant Access to Download
- ✓ Study Anywhere, Anytime
- ✓ 365 Days Free Updates
- ✓ Free PDF Demo Available

Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Money Back Guarantee

Full refund if you fail the corresponding exam in 90 days after purchasing. And Free get any another product.

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

The best test Quiz materials platform for helping you to obtain your dreaming certification as soon as possible.

Exam : I10-001

Title : Certified Information Forensics
Investigator(CIFI)

Vendors : IISFA

Version : DEMO

NO.1 .One caution an investigator should take when examining the source of a network attack is:

- A. an occurrence of Social Engineering
- B. relaxed physical security
- C. the source IP address may have been spoofed
- D. a sniffer could be on the network

Answer: C

NO.2 .Embedding a serial number or watermark into a data file is known as:

- A. Hashing
- B. Steganography
- C. Message Digest
- D. Imprinting

Answer: B

NO.3 .Which of the following are characteristics of electronic Evidence?

- A. Cannot be easily altered
- B. Is not time sensitive
- C. Should follow proper chain of custody
- D. Must be decrypted

Answer: C

NO.4 Drive geometry refers to

- A. The algorithms used to computer a specific location of a particular segment.
- B. The functional dimensions of a drive in terms of the number of heads, cylinders, and sectors per track.
- C. Physical dimensions of the drive platters.
- D. The depth of the pits on optical media or magnetic field charge on magnetic media

Answer: B

NO.5 .What is the difference between a zombie host and a reflector host?

- A. Unlike a zombie, a reflector is a laundering host that fundamentally transforms and/or delays the attacker's communications before they continue down the attack path. (Zombie technique)
- B. Unlike a zombie, a Traceback through the stepping stone host requires determining if two communications streams, viewed at different points in the network, have the same origin and are essentially the same stream. (stepping stone Traceback technique)

C. Unlike a zombie host, the reflector is an uncompromised host that cooperates with the attack in an innocent manner consistent with its normal function.

D. A zombie is a version of a reflector host.

Answer: C

NO.6 .The most important network information that should be observed from the logs during a Traceback is the intruder IP address, the victim IP address, the victim port, protocol information and the:

A. source port

B. operating system

C. MAC address

D. timestamp

Answer: D

NO.7 .The 1st amendment allows hackers to exercise free speech by altering content on websites to express opposing viewpoints.

A. True

B. False

Answer: B

NO.8 .In normal operation, a host receiving packets can determine their source by direct examination of the source address field in the:

A. The IP packet header

B. Source code

C. Audit logs

D. Intrusion Detection System

Answer: A

NO.9 .What technique of layered security design will allow for both investigation and recovery after an incident?

A. RI Technology

B. Highly available systems

C. Overlap design approach

D. Honeypot placement

Answer: B

NO.10 .Stream comparison used as a Traceback technique focuses on what two factors?

A. the IP address and victim port

- B. the packet contents and audit logs
- C. inter-packet timing and the victim port
- D. the packet contents and inter-packet timing

Answer: D

NO.11 .All of the following are methods of auditing except:

- A. Internal audit
- B. External audit
- C. Thorough audit
- D. 3rd party audit

Answer: C

NO.12 .To perform a successful traceback, the two most prominent problems that need to be solved are locating the source of IP packets and:

- A. the timestamp of the event
- B. determining the first node of a connection chain
- C. the reflector host
- D. the victim port

Answer: B

NO.13 .If a CIFI violates the ISFA code of Ethics, her CIFI certification can be immediately revoked.

- A. True
- B. False

Answer: B

NO.14 .Social engineer is legal in the United States, Great Britain, Canada, and Australia as long as the social engineer does not:

- A. Attempt to extract corporate secrets
- B. Lie
- C. Apply the Frye Scenario
- D. Live outside those countries

Answer: A

NO.15 ."Interesting data" is:

- A. Data relevant to your investigation
- B. Pornography
- C. Documents, spreadsheets, and databases

D. Schematics or other economic based information

Answer: A

NO.16 .The term "Browser Artifacts" refer to:

- A. Web browser cache, cookies, favorites, history, auto complete information
- B. Older web browser applications that have little or no security and allow for unchecked use
- C. Older web browser applications that can be used as a surveillance tool for investigators due to their lack of security
- D. Web browser cookies

Answer: A

NO.17 .The major disadvantage to techniques that attempt to mark IP packets as they move through the internet is:

- A. A decrease in network efficiency
- B. An increase in the packet load
- C. An increase in bandwidth consumption
- D. All of the above

Answer: C

NO.18 .In selecting Forensic tools for collecting evidence in the investigation of a crime the standard for authenticating computer records is:

- A. The same for authenticating other records. The degree of authentication does not vary simply because a record happens to be (or has been at one point) in electronic form.
- B. Much more complex, and requires an expert to be present at each step of the process.
- C. To convert the technical terms & definitions into a basic understandable language to be presented as evidence.
- D. To ensure the tools are equipped with logging to document the steps of evidence collection.

Answer: C

NO.19 Firewalls are an excellent source of:

- A. Details of system usage
- B. Details of protocol usage
- C. Forensic Evidence for malicious attacks
- D. Port/service mappings

Answer: C

NO.20 .A new protocol that is designed to aid in intrusion protection and IP tracebacks is known as:

- A. Intruder Detection and Isolation Protocol (IDIP)
- B. Intrusion Detection and Traceback Protocol (IDTP)
- C. Facilitating Traceback Protocol (FTP)
- D. Intruder Detection and Internet Protocol (IDIP)

Answer: A
